

ITN 276 – Computer Forensics I

Project 2 –Digital Forensics Deep-Dive

- | | |
|--------------------------------------|----------------------|
| - Assignment Date: | Week 4 |
| - Technology or Topic Selection Due: | Week 7 |
| - Deliverables Due Date: | Weeks 14 - 15 |

Learning Objectives:

- Cultivate deep knowledge about a piece of digital forensics technology, either hardware, software, or a particular topic of interest.

Tasks:

- Select either a piece of computer forensics hardware, software application, or a particular topic in digital forensics that interests you.
- Learn how to use your selected hardware or software, or study your selected topic.
- Present your findings to the class in a formal presentation

Deliverables:

- A printed, two-page report on your hardware, software, or topic in Microsoft Word in the following format:
 - 1-inch margins top, bottom, left, and right
 - 1.5 line spacing
 - 12-point, Courier New font
 - Title centered at top of first page
 - One space between title and first paragraph.
 - Page numbers centered at bottom of page.
 - First paragraph contains a summary of the hardware or software package you chose.
 - Overall look and feel of your report must be concise and professional.
- Deliver a 10 to 20-minute demonstration of your chosen hardware, software, or deliver the report on your topic to the class.
